DETAILED ACTION

Specification

1. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: there is no antecedent basis for the subject matter of claim 36 in the specification.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claim 36 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Applicant does not describe a method of making a processor wherein during fabrication defining at least one writable store and likely pointer value detection logic.

Allowable Subject Matter

4. Claims 1-11, 16-17, 19, 21-25, 27-32, 34, and 37-42 are allowable over the prior art.

Response to Arguments

5. Applicant's arguments filed 03 December 2004 have been fully considered but they are not persuasive.

Applicant argues that MPEP 608.01(o) is inapplicable to the present situation. However, the Examiner notes that MPEP 608.01(o) sets forth that "meaning of every term used in any of the claims should be apparent from the descriptive portion of the specification". The claims are not the "descriptive portion" of the specification. MPEP 608.01(o) is not limited to situations in which material is added during prosecution.

With respect to the argument that the original claim 36 provides an indication that Applicant had possession of the invention under 35 U.S.C. 112, first paragraph, the Examiner first notes that the subject matter of claim 36 must find support in the written description. Furthermore, even adding, verbatim, the language of claim 36 into the written description does not provide an adequate written description of how one would "define" a "writable store" or "likely pointer-value detection logic" during the fabrication process.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period

Art Unit: 2188

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
